

[1st POCACITO Roadmap Workshop \[1\]](#)

Date:

11 March 2016

Location:

CEPS (Working Party Room) Place du Congrès 1, 1000, Brussels

CEPS and Energy Cities have the pleasure of welcoming you to the first of two workshops that will bring together EU stakeholders to discuss how to make post-carbon cities a reality.

The workshops will focus on preparing a high level document or 'roadmap' for policymakers to offer recommendations on how to plan for long term impacts, with the

aim to achieve by 2050 liveable post-carbon cities, i.e. economically robust, environmentally resilient, providing high quality of life and socially inclusive.

This first workshop will discuss the contents and structure of the document with stakeholders, built on the work already undertaken. The meeting will be highly interactive, consisting of collaborative group work and facilitated discussion between participants.

(The second workshop is planned for the second half of this year, on June 27. In that workshop a draft final document will be presented and discussed, aiming for a final document that participants can endorse.)
