POCACITO Roadmap [1]

The roadmap of the project *POCACITO 2050* is a document directed at national and EU policymakers, and is made of the information and positions acquired in the stakeholder workshops in case study cities and POCACITO's own research.

The aim is to bring to the attention of policymakers at the EU and national level the aspects that cities cannot resolve themselves and which need tools that may often be of regulatory nature. The roadmap will highlight the local priorities and the identified barriers to achieve them, listing possible policy solutions.
