

[Whitehill & Bordon regeneration project](#) [1]

The regeneration of Whitehill & Bordon is meant to transform the area into a low carbon, green and sustainable city. The town is expected to grow from 6,000 homes to over 9,000 when fully built, and new jobs and a new city centre will be created. Inclusion processes have been used to develop a master plan for the area, including projects for renewable and efficient energy supply, transport solutions, nature conservation and new business and work opportunities.
