

[Collated Strategy Papers for the Case Study Cities](#) [1]

This report presents the strategy papers developed with the assistance of the city case study stakeholders. The cities involved in the exercise were Malmö, Copenhagen, Barcelona, Zagreb, Istanbul, Milan, Turin, Litoměřice and Lisbon.

This report on strategy transition intends to summarise the key findings from the stakeholder workshops and the recommendations on further steps to bring the cities onto a decarbonisation pathway. The document presents the lessons from the vision and backcasting exercises, offering city authorities clues on how to perform consultations, define visions in line with the views of citizens, fix milestones and plan actions in a long-term perspective.
