

## [Local savings to finance energy transition](#) [1]

10 June 2014 - 2:09pm  
Béatrice Alcaraz

Where can we find the financial resources necessary to implement energy transition in towns and cities ? As this issue tends to be given secondary importance in a context of reduced public spending, Energy Cities explains two ways of making local savings a genuine energy transition driver.

Crowdfunding and citizens' cooperatives

What is it about ?

A cooperative is an association of persons founded on the principle of collective ownership whose aim is to serve the interest of its members. (...)
