

Zagreb Vision Building Workshop [1]

Date:

19 November 2014

Location:

Impact HUB Zagreb

Zagreb Vision Building Workshop was organized at HUB Zagreb premises which nicely matches the project idea and HUB mission which is to create positive social impacts. The event involved a diverse group of stakeholders to shape the vision for post carbon city of Zagreb. Prior to the event, citizens were also engaged in the process by voting for most relevant indicators for quality of life in the city through the online survey. Citizens' responses were used as an input for the process of the

workshop. Creative methods (drawings, mental maps etc) were used at the workshop to help participants unleash their minds and expressions. The City itself is currently without active strategic plan so the participation of representatives from City Office for Strategic Planning was very important and welcomed in the workshop. The narratives for the vision were seen as the main output of the workshop.
