

## [AICGS Releases Report on Future of Power in Post-Carbon Society](#) [1]

[2]

4 May 2015 - 6:30pm  
Ecologic Institute

The American Institute for Contemporary German Studies at Johns Hopkins has released a report detailing the future of power in a post-carbon society. Max Grünig, from Ecologic Institute co-authored the report with David Livingston. Max is also a key member of the POCACITO project.

This Policy Report offers German and American perspectives on the emerging fuel challenges in the transportation sector and the potential for “post-carbon” cities. It is an example of AICGS’ commitment to comparing and contrasting the interests and policies of Germany and the United States in an effort to identify common policy challenges, choices, and opportunities.

The [full report](#) [3] is now available.
